Top Skills

Apache Flink
LangGraph
LangChain

Certifications

NVIDIA-Certified Associate: Generative AI LLMs
NVIDIA-Certified Associate: Generative AI LLMs
Google Cloud Professional Data Engineer
Databricks Certified Data Engineer Associate

Sai Guntupalli

Senior Data Engineer & Python Developer | Agentic AI | PySpark | AWS | Snowflake | GCP & Databricks Certified
Edison, New Jersey, United States

Summary

Senior Python Developer and Data Engineer with 10 years of experience building scalable data pipelines and backend systems across Media and Finance.Currently working at Disney (via Tavant), where I combine core Data Engineering with Agentic AI to automate workflows — including an autonomous OnCall Agent (Python, LangChain, LangGraph) that self-heals Airflow job failures in production, and a SQL Agent enabling marketing teams to query Snowflake via natural language in MS Teams.Previously at NBCUniversal, I optimized Spark pipelines improving processing speed by 70%, and re-engineered legacy pipelines reducing runtime from 12 hours to 3. At Experian, I built credit bureau data pipelines for USAA Bank. At Twitch, I developed real-time alerting systems using Apache Flink and AWS Kinesis.Core Stack: Python | PySpark | Snowflake | Databricks | Apache Airflow | AWS (S3, Lambda, EMR, Kinesis, Glue) | LangChain | LangGraph | KafkaCertified: GCP Professional Data Engineer | Databricks Data Engineer Associate | NVIDIA Generative AI LLMs

Experience

Tavant
2 years 4 months

Technical Architect
January 2026 - Present (8 months)
Texas, United States

Client: The Walt Disney Company (via Tavant)

• Building a SQL Agent (Python + AWS Bedrock) enabling Disney marketing teams to query Snowflake data through MS Teams using natural language — currently in development.

• Built and deployed an autonomous OnCall Agent using Python, LangChain, and LangGraph, integrated with Airflow to trigger on job failures — performs root-cause analysis and self-healing in production.
• Integrated GitHub Copilot into the project development lifecycle to accelerate code reviews, generate unit tests for Python microservices, and refactor legacy code.
• Managing Disney's Acquisition Data Foundation (ADF): ingesting marketing spend data from social media vendors into Snowflake via Python, PySpark, Databricks, Fivetran, and Airflow.
• Responsible for end-to-end pipeline reliability ensuring data is available daily for downstream marketing analytics.

Associate Technical Architect
May 2024 - January 2026 (1 year 9 months)
New Jersey, United States

Wipro
Technical Lead
November 2023 - May 2024 (7 months)
New Jersey, United States

Tavant
7 years 3 months

Technical Analyst
March 2022 - December 2023 (1 year 10 months)
New Jersey, United States

Technical Lead
October 2021 - March 2022 (6 months)
Hyderabad

Senior Software Engineer
April 2019 - November 2021 (2 years 8 months)
Hyderabad Area, India

Software Engineer
April 2017 - April 2019 (2 years 1 month)
Bengaluru

Project Trainee
October 2016 - April 2017 (7 months)
Bengaluru

Education

Gudlavalleru Engineering College

Bachelor of Technology - BTech, Computer Science · (May 2016)

NRI Junior College

Intermediate, MPC · (2010 - 2012)

Jawahar Navodaya Vidyalaya, Guntur

SSC, CBSE · (2005 - 2010)
